Ilya Grishkov

Senior Software Engineer

I'm a senior software engineer with 10+ years of Python/Django experience based in Prague, Czechia. Extensive full-stack capabilities with deep expertise in backend systems, performance optimization, and system architecture. Experienced in both IC and technical leadership roles.

Skills

Technical Skills

Python, Django, Flask, PostgreSQL, MySQL, Redis, JavaScript, TypeScript, React, Angular, Docker, Kubernetes, GCP, AWS, Git, Linux, TeamCity, Webpack, CSS/SCSS

Languages

English (B2), Czech (B2), Russian (native)

Experience

Wargaming

Python Flask Django React MySQL Redis Docker TeamCity

Senior Python Developer / Team Lead • July, 2020 — Present

Prague, Czechia

- Lead team of 3 developers while maintaining hands-on development role (Dec 2024 - Present, ~50% time hands-on) - architecture decisions, code reviews, technical problem-solving, mentoring, 1-on-1s, and performance reviews
- Led Django/Python modernization of one of the company's largest web services from Django 1.6/Python 2.7 to Django 4.2/Python 3.11 across a 10-year-old project, making it one of the most modern systems in the company
- Led the rework of one of the main title's subsystems which decreased the peak server load by 14% and unblocked multiple other features
- Took over troubled project and successfully released multiple versions despite team having no prior technical experience and very limited budget

Aktis

Python Django Angular Redux Jenkins Docker Kubernetes GCP Cloud Firestore

Full-Stack Developer / Team Lead • May, 2018 — Apr, 2020

Prague, Czechia

- Started as a full-stack developer and eventually moved to a team lead position
- Developed an authentication solution using Cloud Firestore and custom Django ORM binding
- Sketched out numerous application features and infrastructure changes
- Took responsibility for the infrastructure and release process improvements

Zitemedia

Python Django Angular Flask Ionic Meteor Jenkins Gitlab Docker AWS

Lead Developer • Mar, 2014 — Apr 2018

Prague, Czechia

- Technical design and development of multiple web pages and applications using Django, Flask, Angular and Meteor frameworks
- Developed multiple mobile applications using Ionic framework
- Implemented a PaaS Docker-based hosting for the company needs
- Set up continuous integration using Jenkins and Gitlab

LISSI-Soft

Systems Software Engineer • Mar, 2010 — Aug, 2013

C C++ Qt

Moscow, Russia

- Worked as a part of the cross-platform firewall development team, responsible for core and administration tools development, hardware and user support
- Added GOST cryptography support to the NGINX web server

Keldysh Institute of Applied Mathematics

Software Engineer Intern • Sep, 2009 — Feb, 2010

C++ Qt

Moscow, Russia

- Developed a cross-platform GUI for a scientific application

Education

The Institute for Language and Preparatory Studies, Charles University

Czech Language Courses (B2) • 2013 — 2014

Podebrady, Czechia

Moscow State Technological University "Stankin"

Engineer's degree, Computer-aided design • 2004 — 2010

Moscow, Russia
